## Medicaid Cuts Hurt Us All

### Medicaid is Crucial

Congress is currently considering a \$2.3 TRILLION cut to Medicaid. This would be devastating for children and vulnerable people across America!

### Medicaid Cuts Hurt Rural and Urban Areas

Rural hospitals, urban safety-net hospitals, and specialty children's hospitals rely heavily on Medicaid funding. **Medicaid cuts could close hospitals in rural and urban communities across the country.**

### Medicaid Cuts Create Gaps in Pediatric Care

Children's hospitals are the core of the health care delivery system for children, bringing together teams of specialists to provide care not available in any other setting. They cannot stay open without Medicaid. **Even if you have private insurance, cuts to Medicaid will impact your access to pediatric care!**

### Medicaid Cuts Take Away Jobs

Health care employs millions of people, from nurses to medical technicians to administrators. A cut of this magnitude could lead to significant job losses, further harming local, state, and national economies.

### Medicaid Cuts Put People in Institutions

Without services provided by Medicaid, many people with disabilities would be forced out of their homes and into expensive hospitals and long-term care institutions against their will. **This would hurt them and ultimately increase government spending.**
